

JAGUARS IN THE WILD

Jaguars are the world’s third-largest cat. Only the tiger and the lion are bigger. Find out more about jaguars by reading the web below. Then use this week’s cover story and the information in the web to help you answer the questions below.

1. Read the story “Gaining Ground” (pp. 4-5). Then use two facts from the story to complete the web.

2. Jaguars are nocturnal; they hunt at night. List two features that help them to hunt.

3. Jaguars that live in the forest have darker coats than those that live in open grasslands. How else do jaguars adapt to their environment? Give two examples.

4. Write two questions that can be answered from reading this web. Then trade papers with a classmate and challenge him or her to answer each question.
